ABOUT ME

Product Engineer with hands-on software development experience. I combine technical expertise with product thinking to build user-focused software products. I'm experienced in building products from the ground up around user needs identified through feedback, iteration, and observation.

EXPERIENCES

Beyond Education

July 2025 - Oct 2026

Product & Software Engineer

- Designed and built the core of the product, then improved the experience by observing user behavior and gathering feedback.
- Communicated with 50+ schools and prioritized customer needs using user feedback to guide product improvements.
- Created presentations, tutorials, brochures, and user guides to simplify product adoption for non-technical users.

Softylines

Feb 2025 - June 2025

Software developer (internship)

- Developed an AI-powered learning platform that transforms educational content into interactive quizzes to simplify complex lessons.
- Integrated payment gateway to enable secure token purchases, supporting the platform's through credit-based access model.

Aftercode

Mar 2024 - January 2025

Software developer (internship)

- Contributed to 6+ projects including SaaS platforms, dashboards, e-commerce sites, and landing pages using modern technologies.
- Fixed 10+ issues on a well-known Tunisian brand's website and created a dashboard to manage their products, orders, promotions...
